

# MANUFACTURING IOT CYBER SECURITY

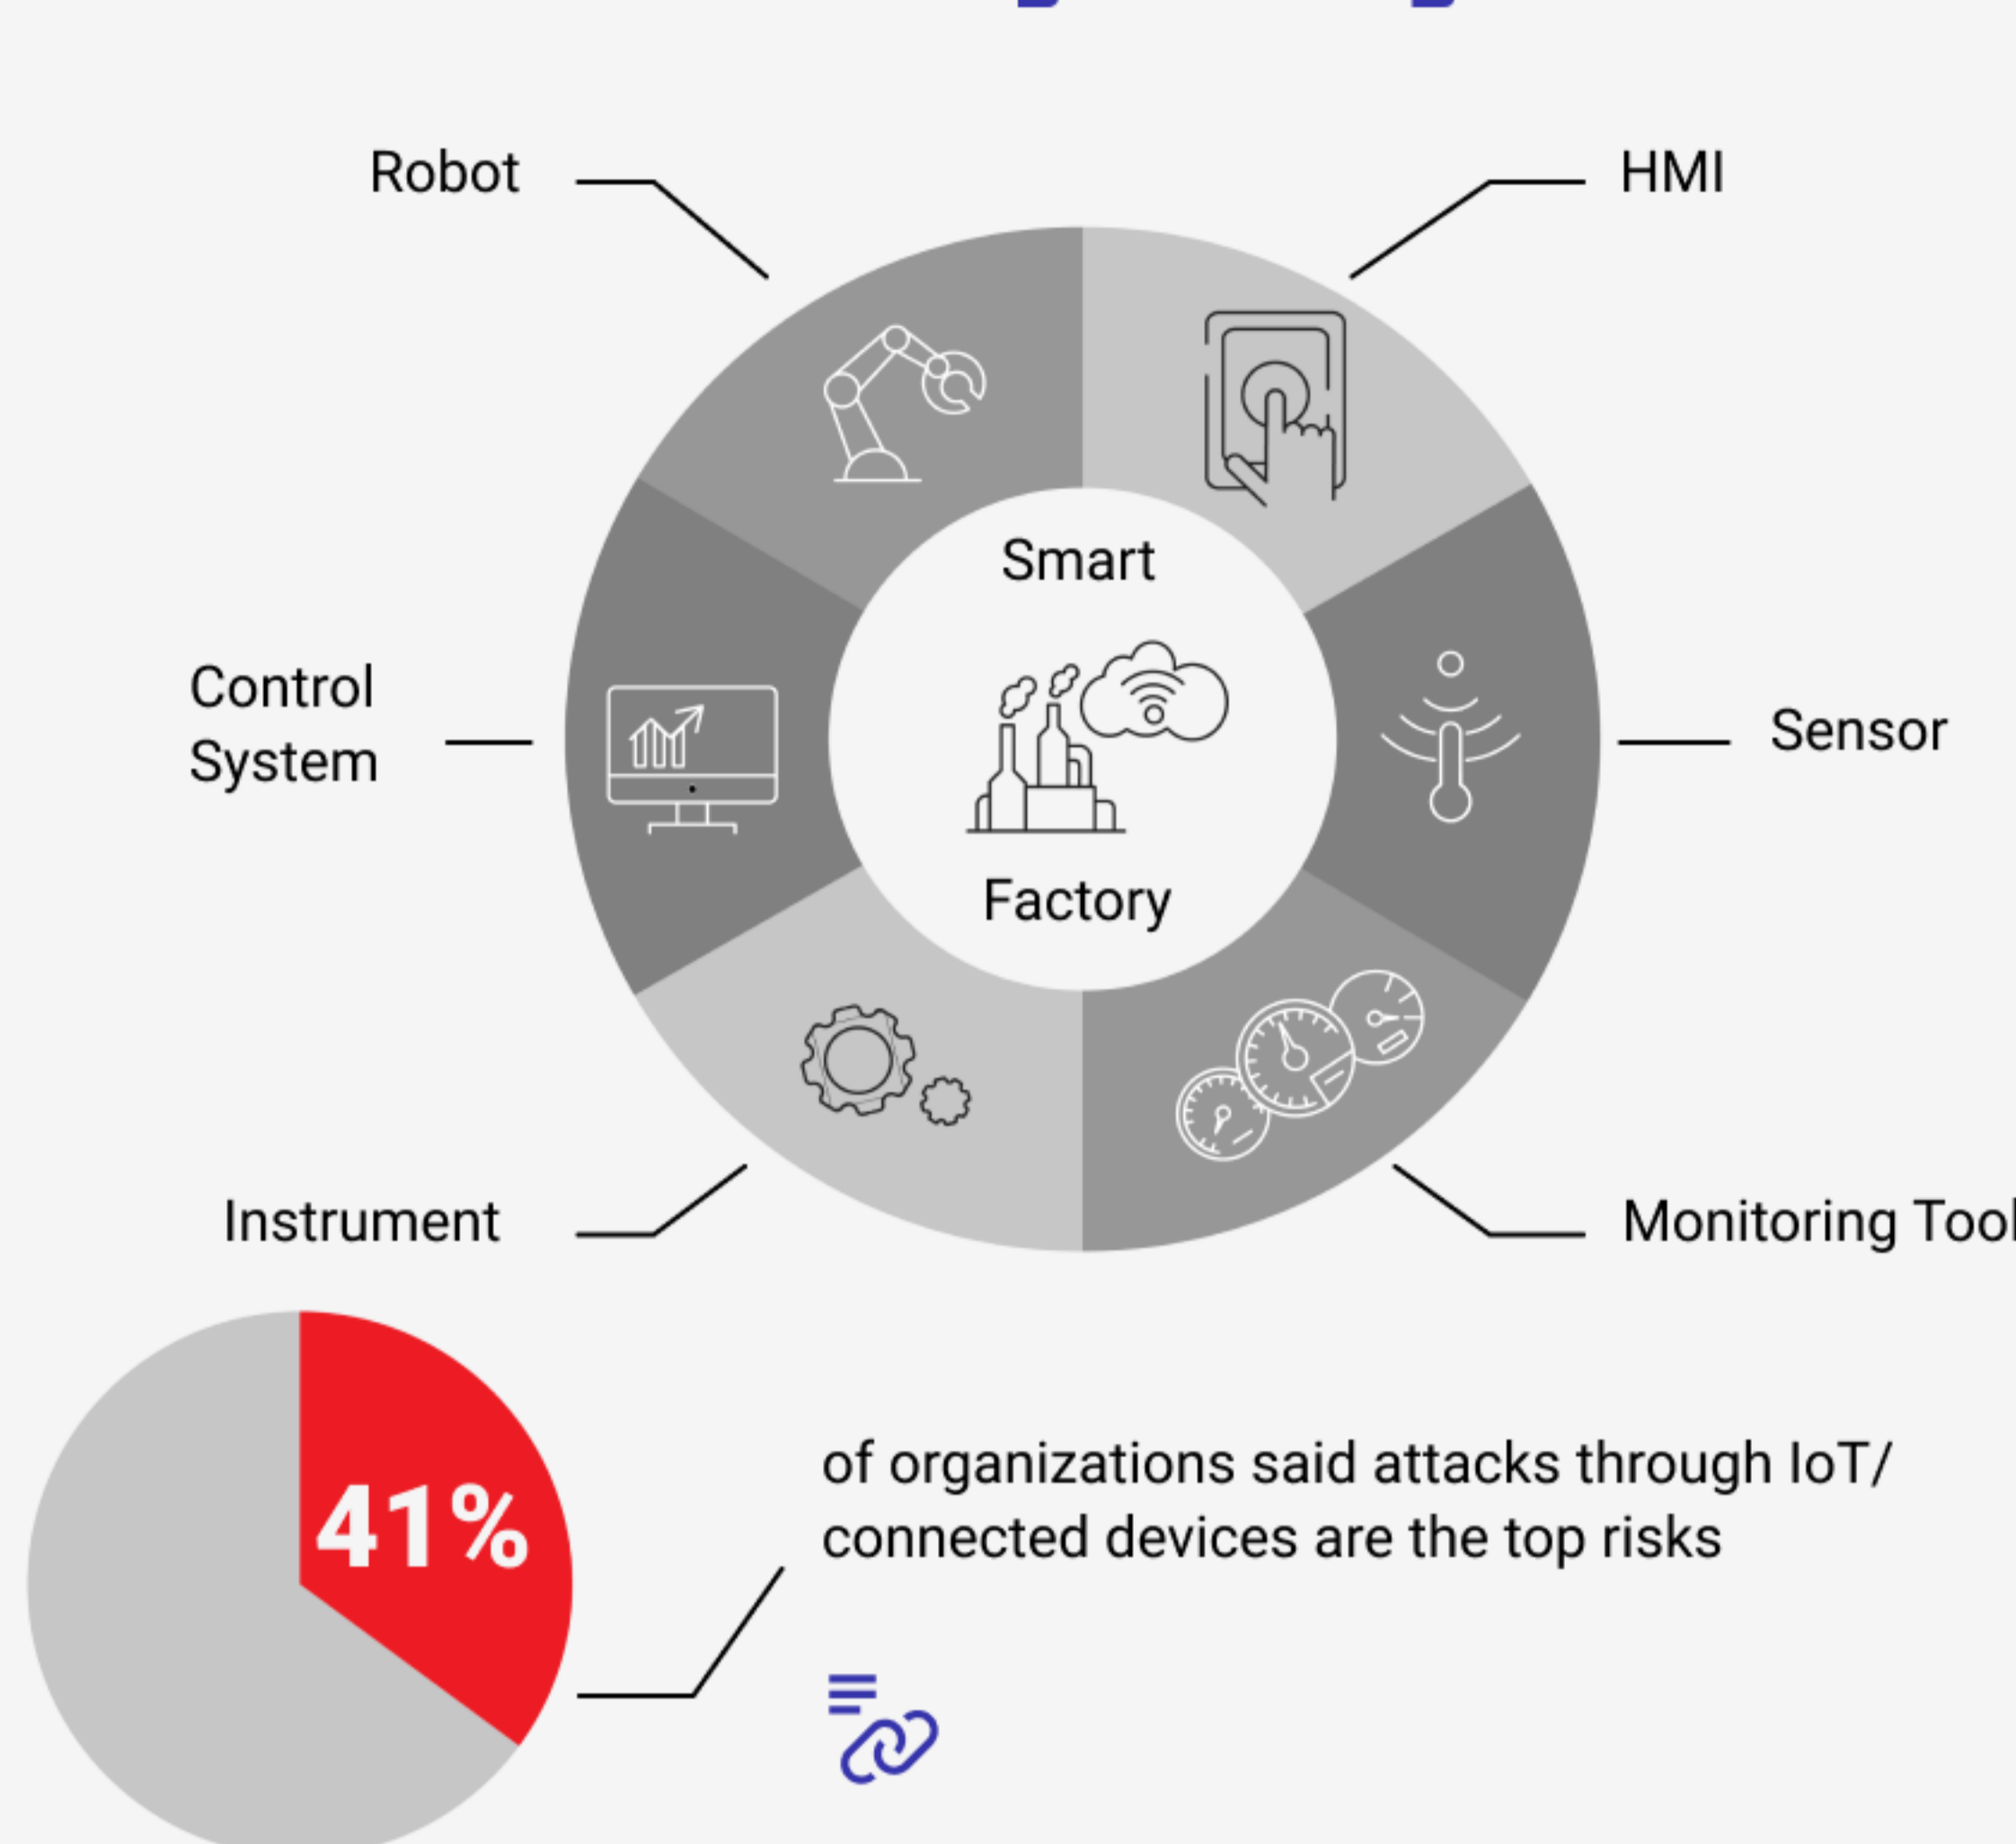

## Manufacturing Under Cyber Attack

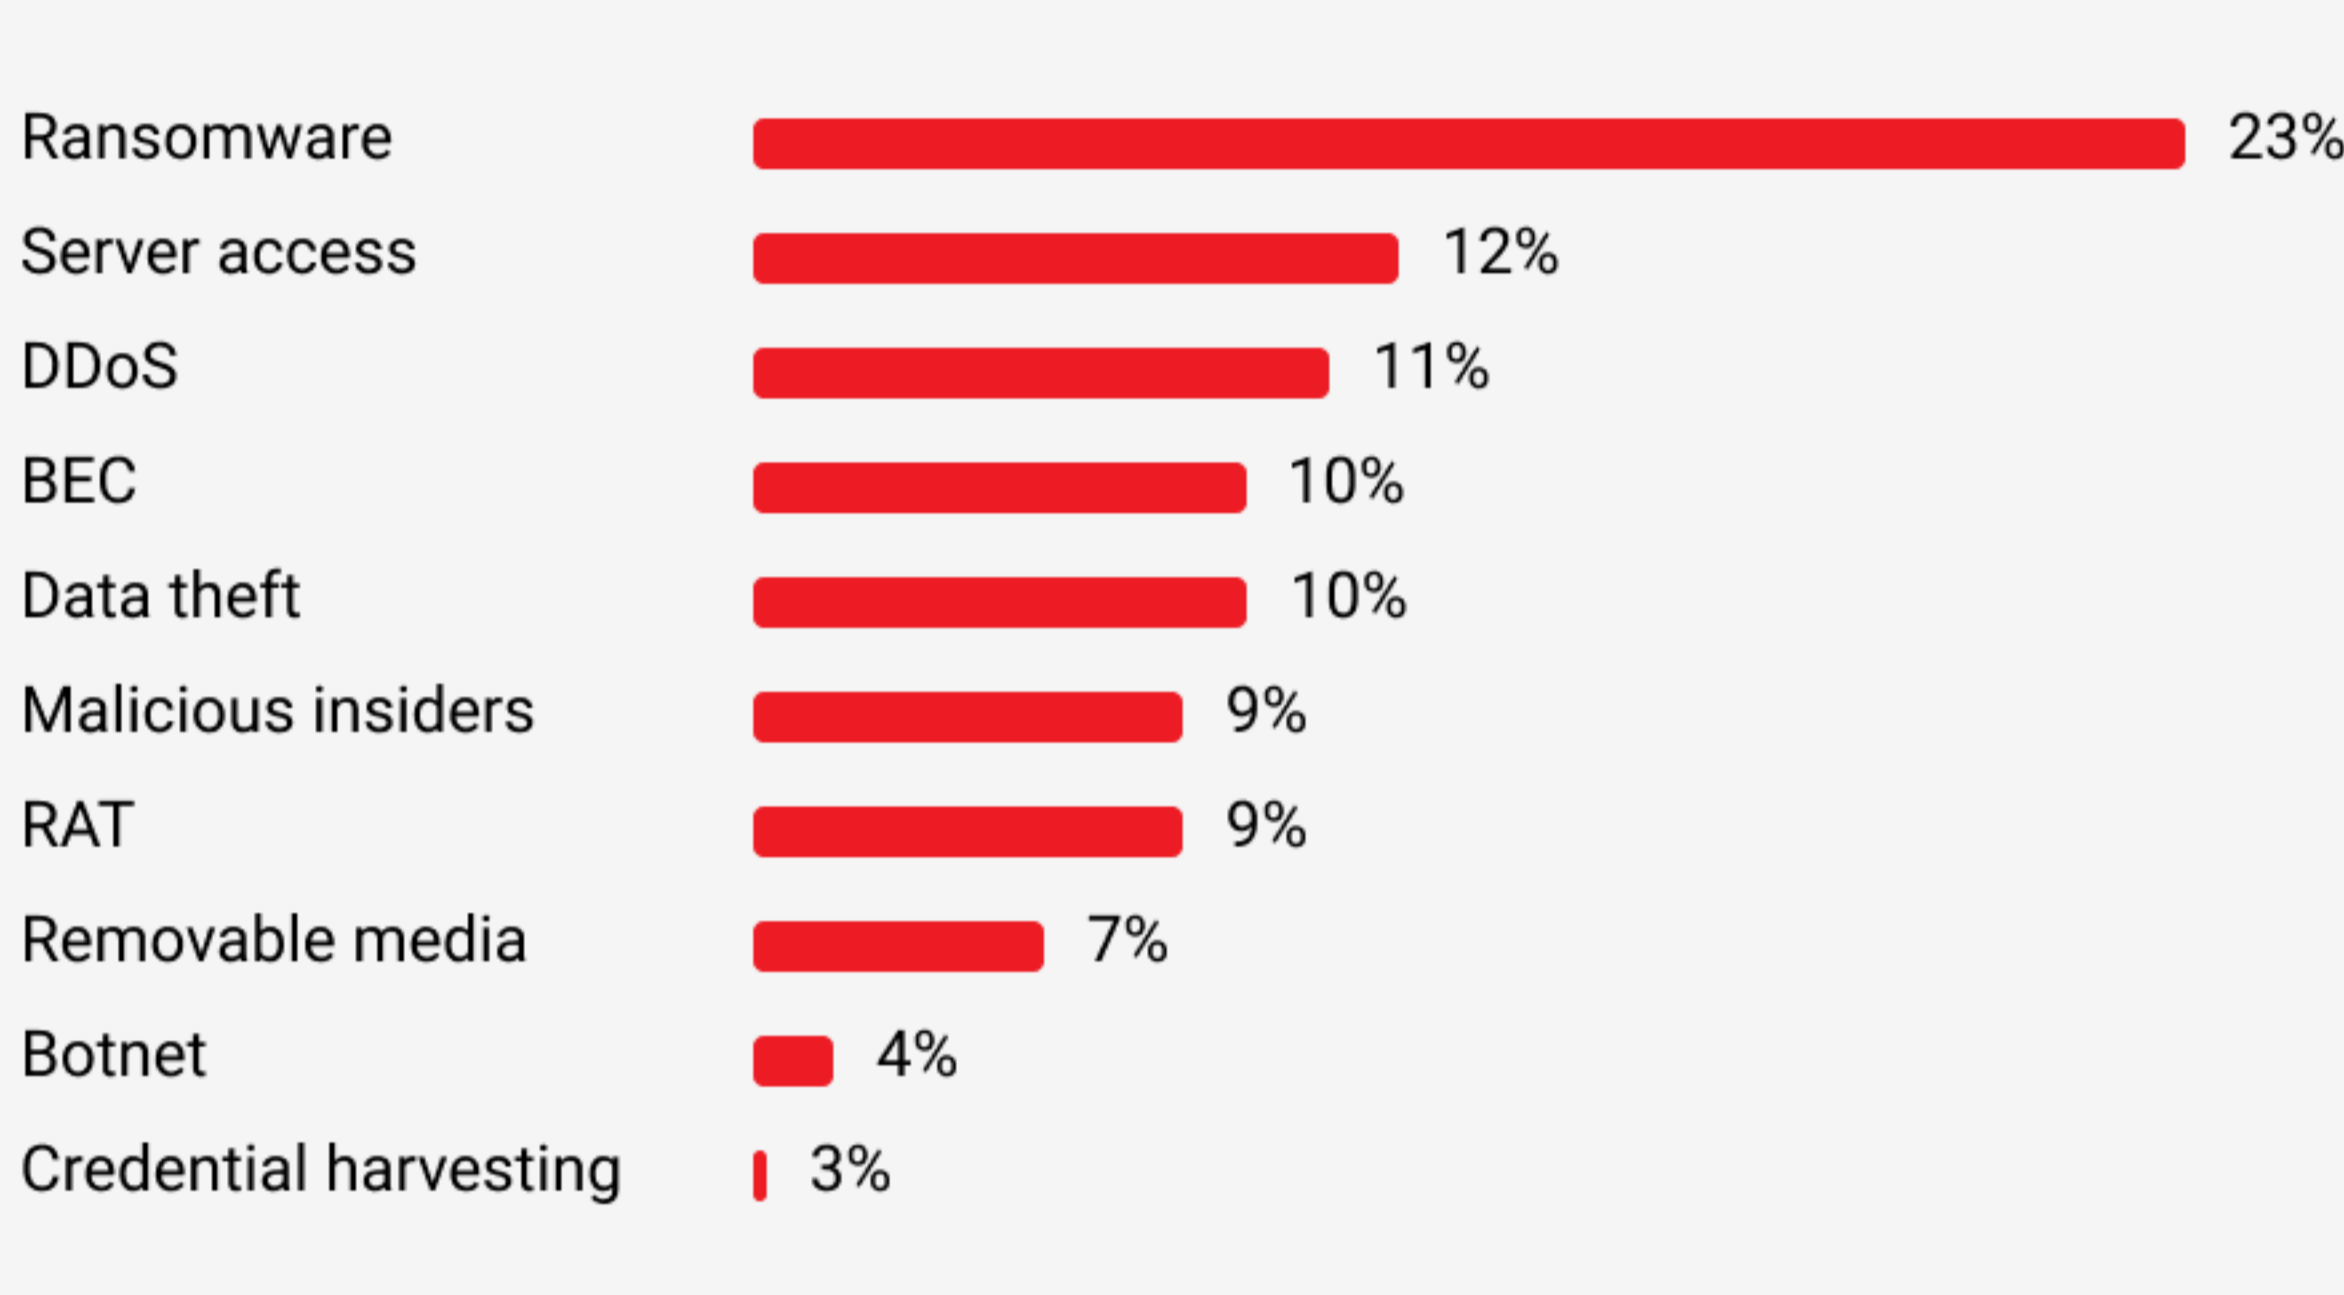

## IoT Transforms Manufacturing

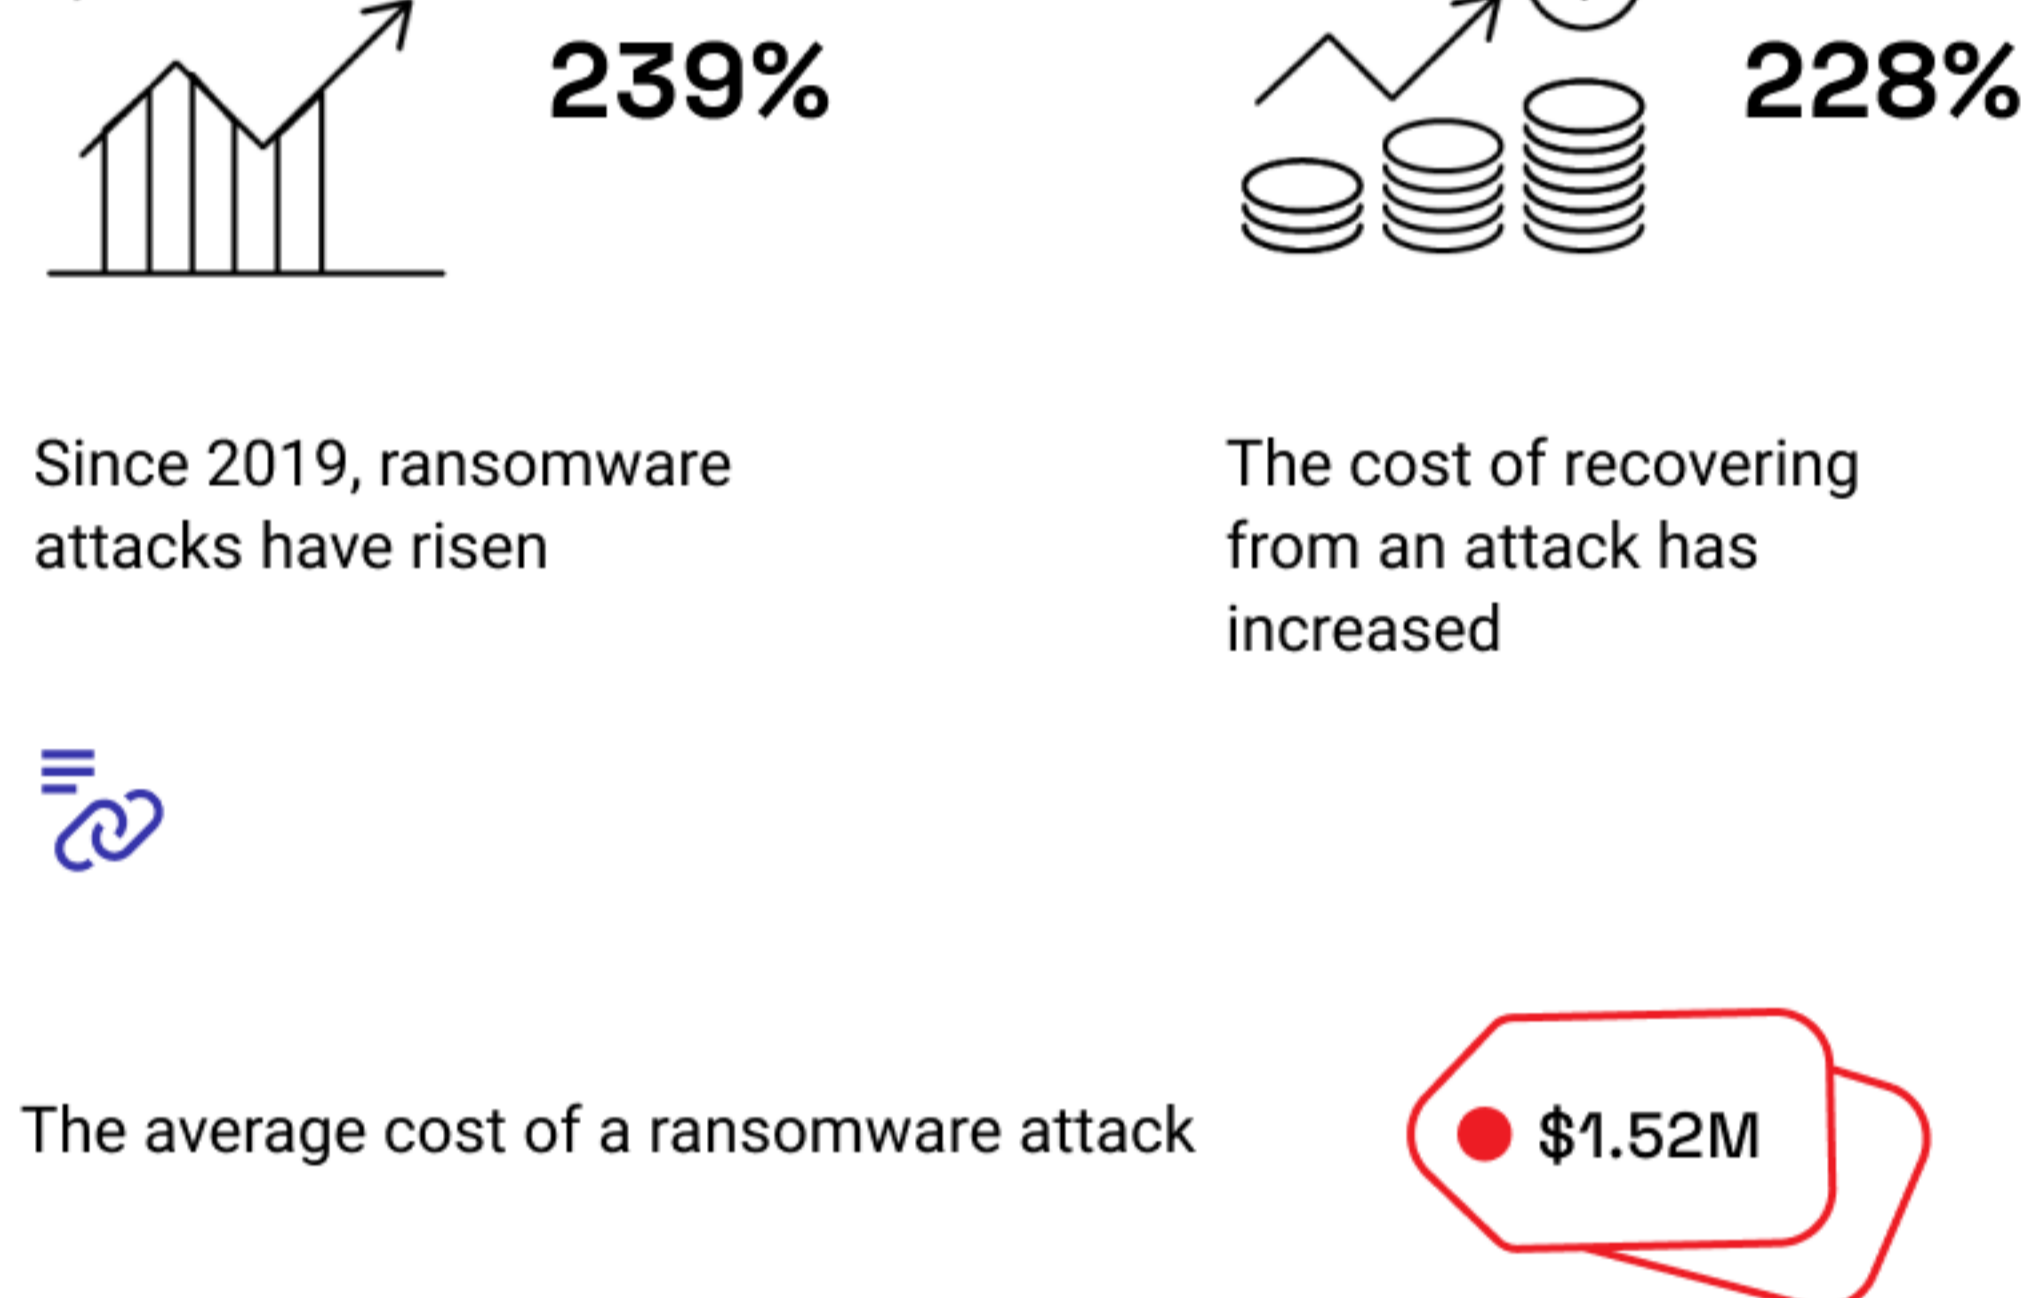

## IoT Devices are Cyber Targets

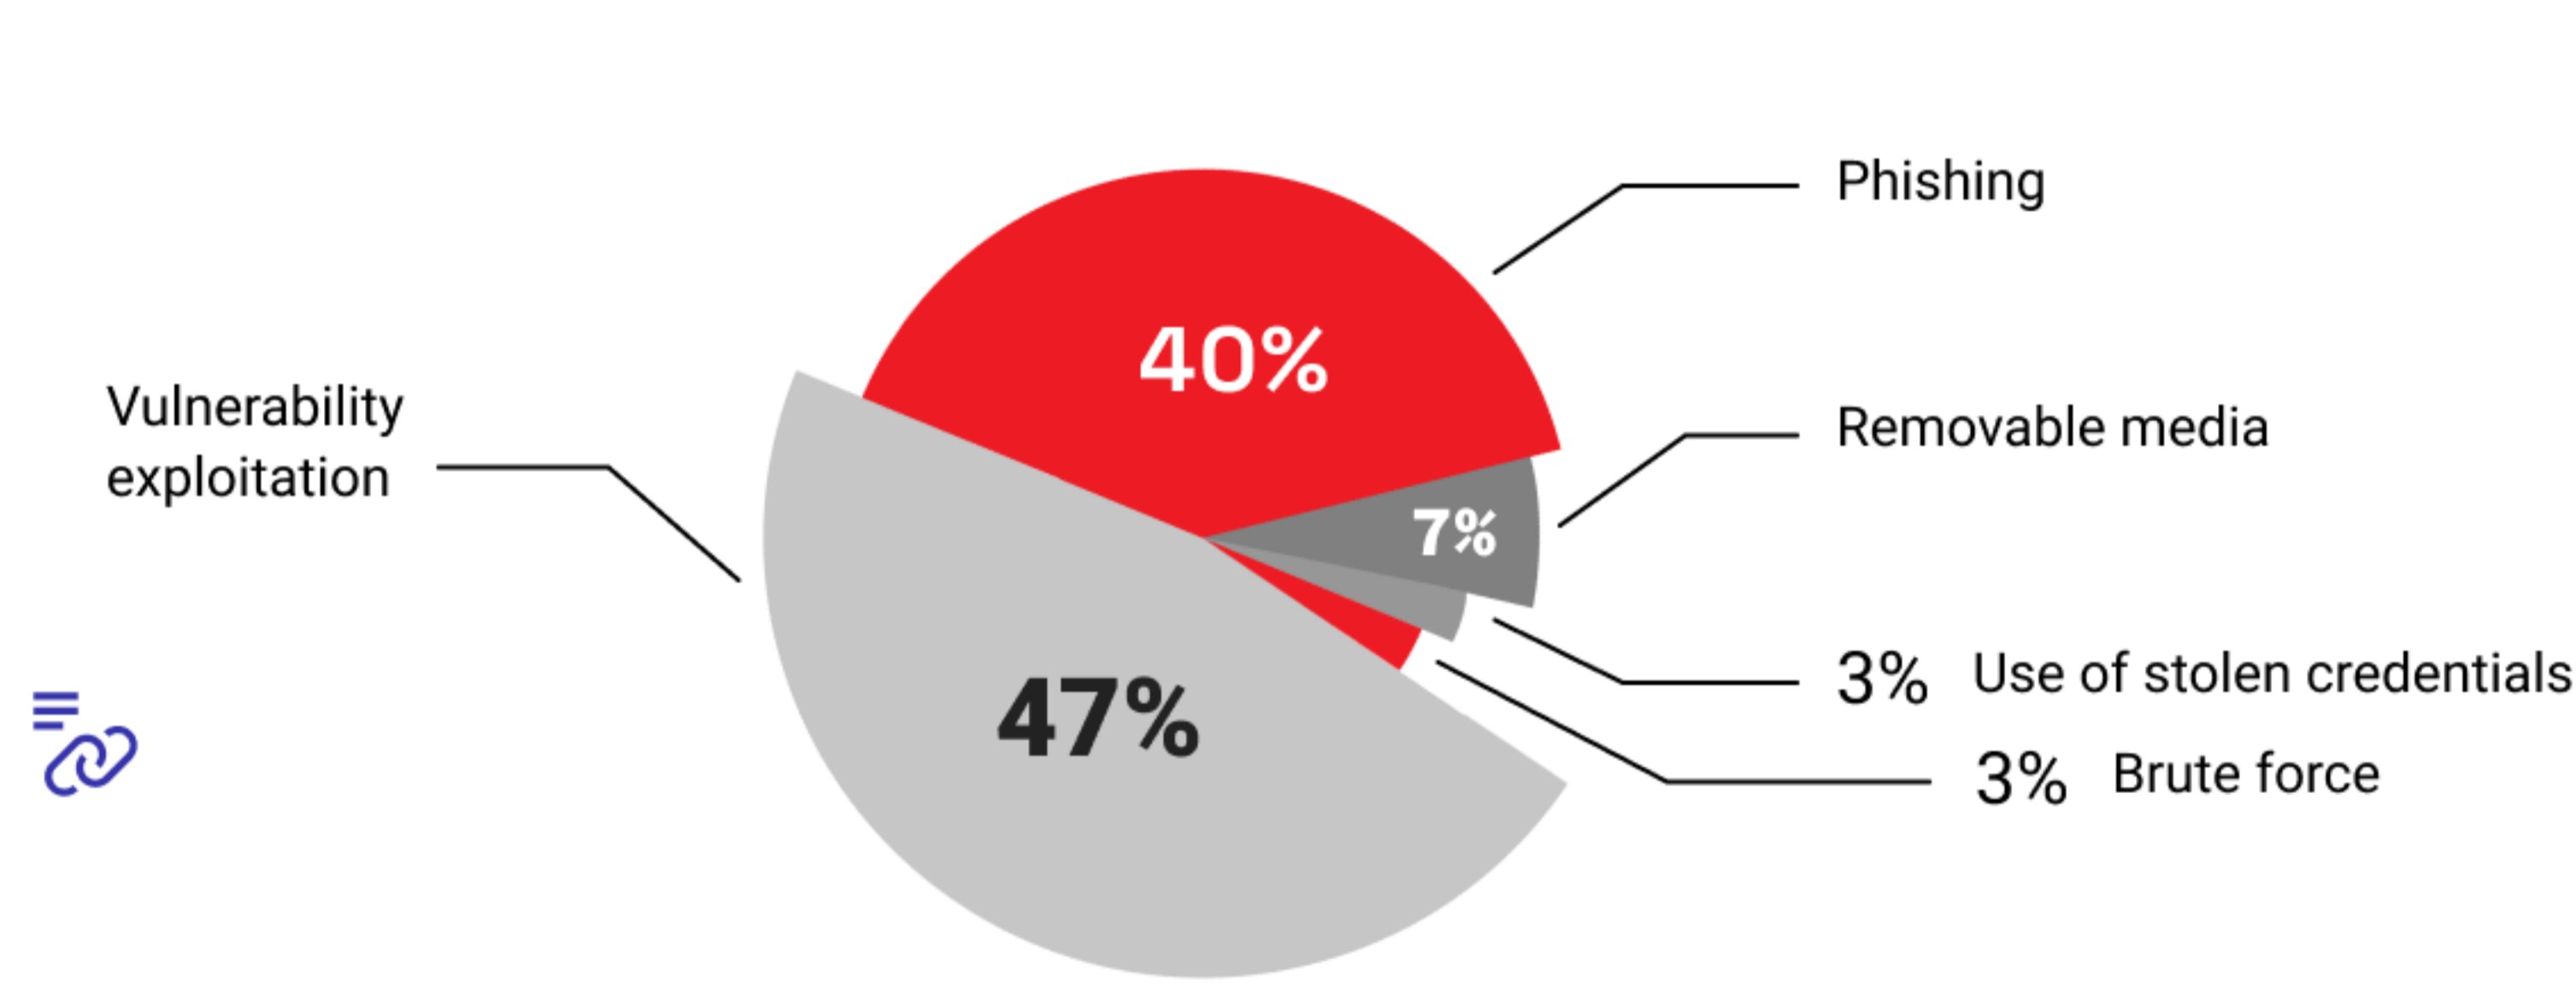

## Top Attack Types:

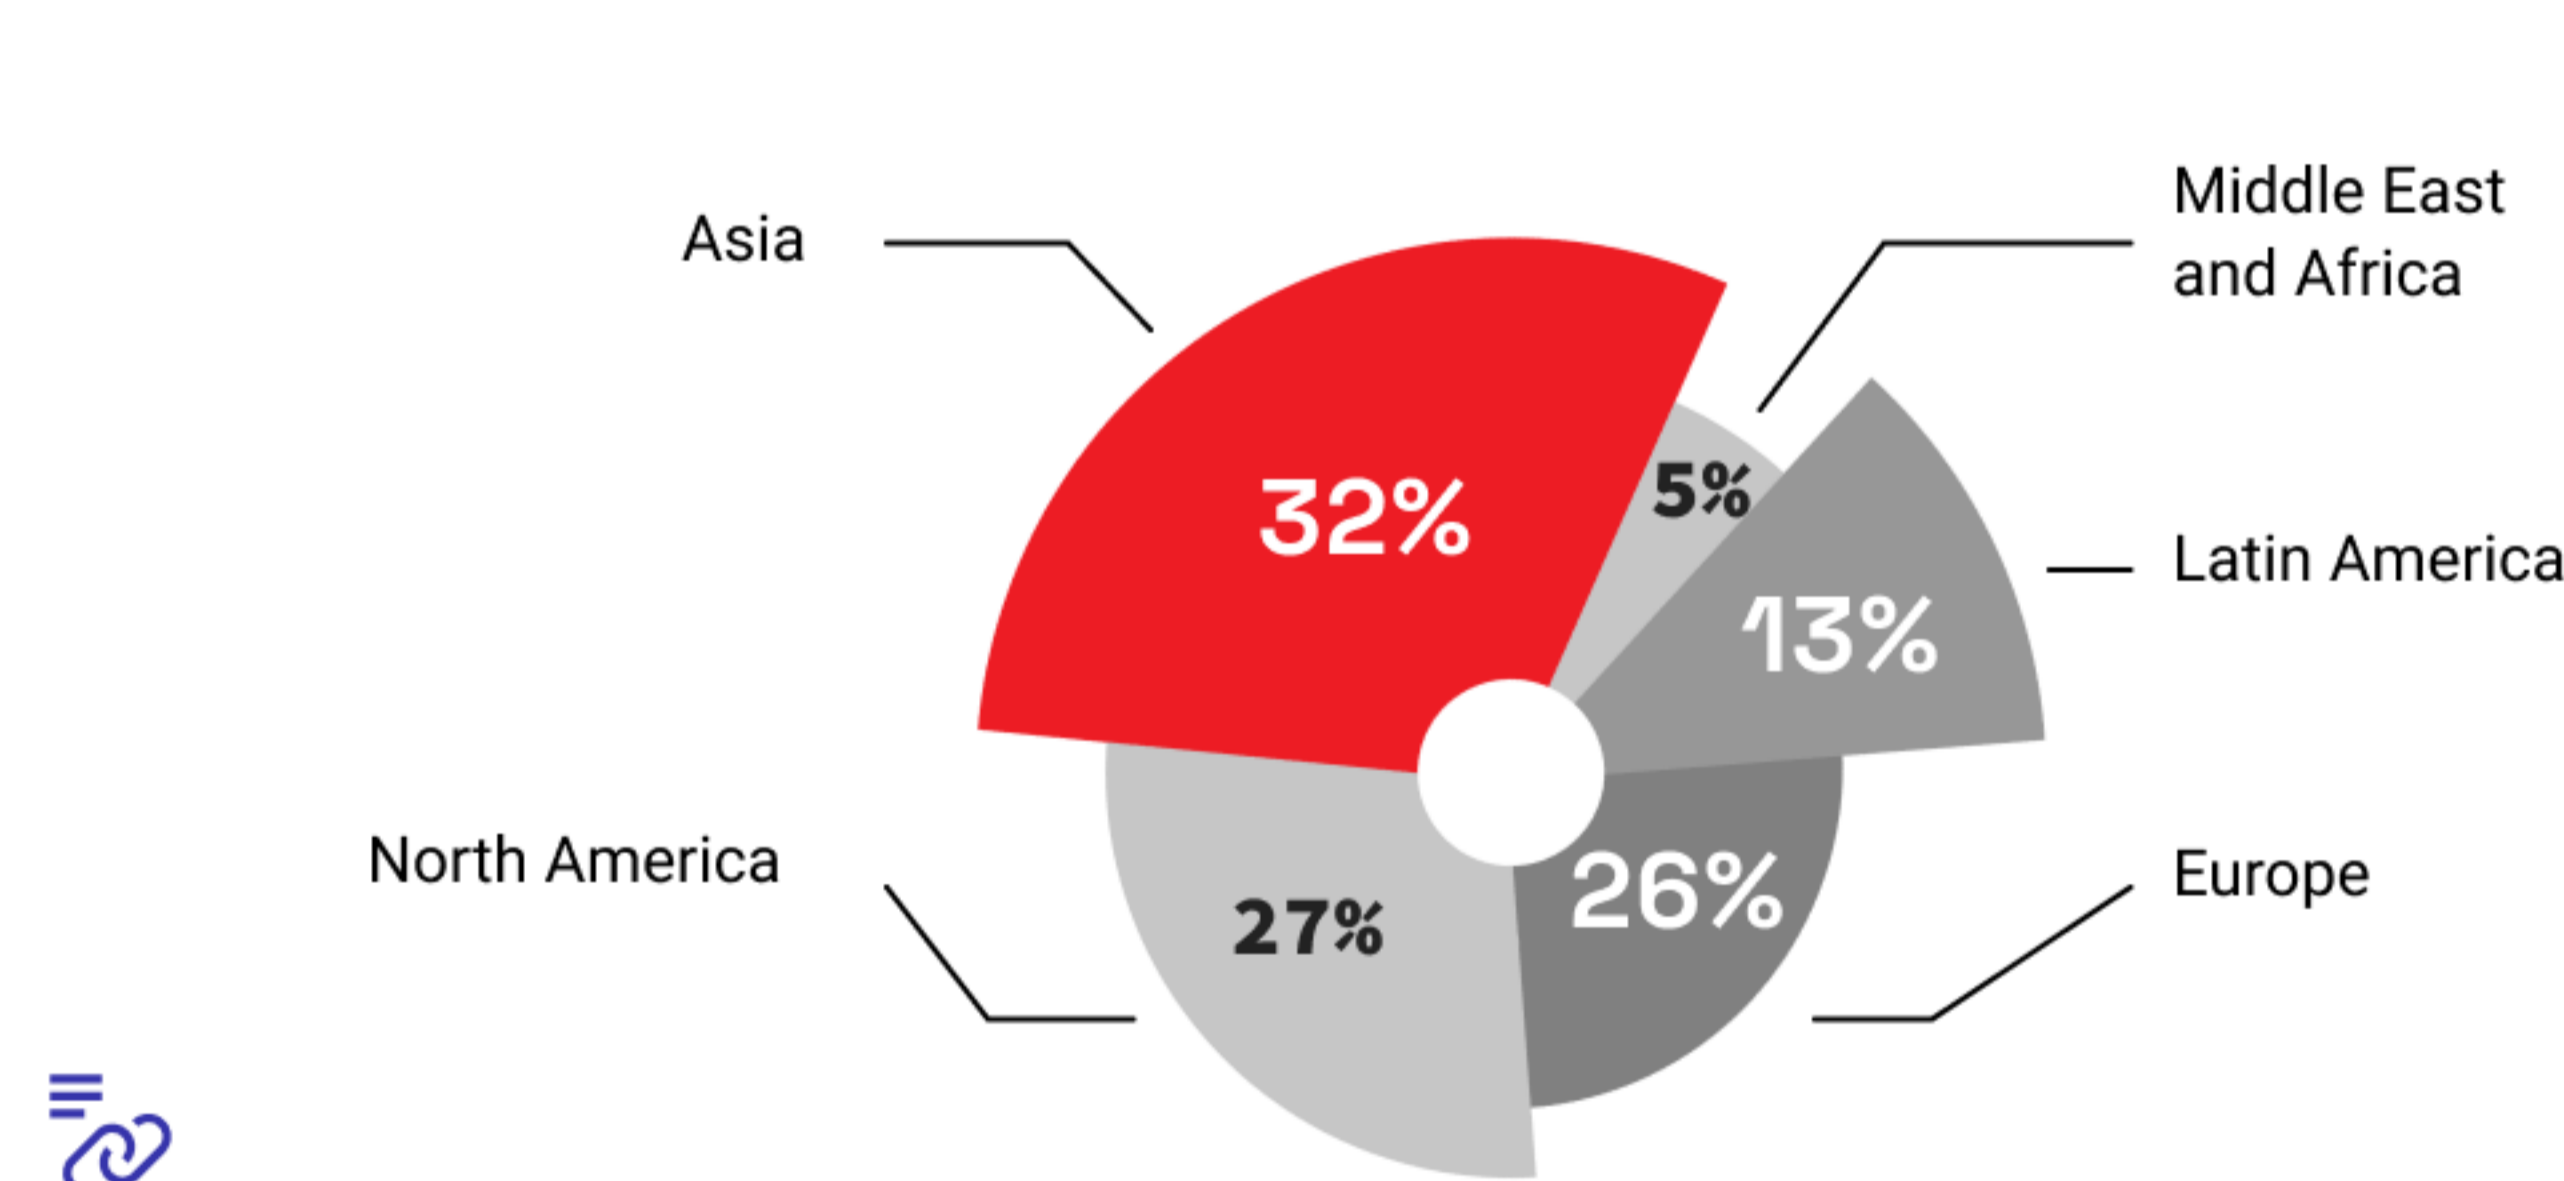

## Ransomware Attacks are on the Rise

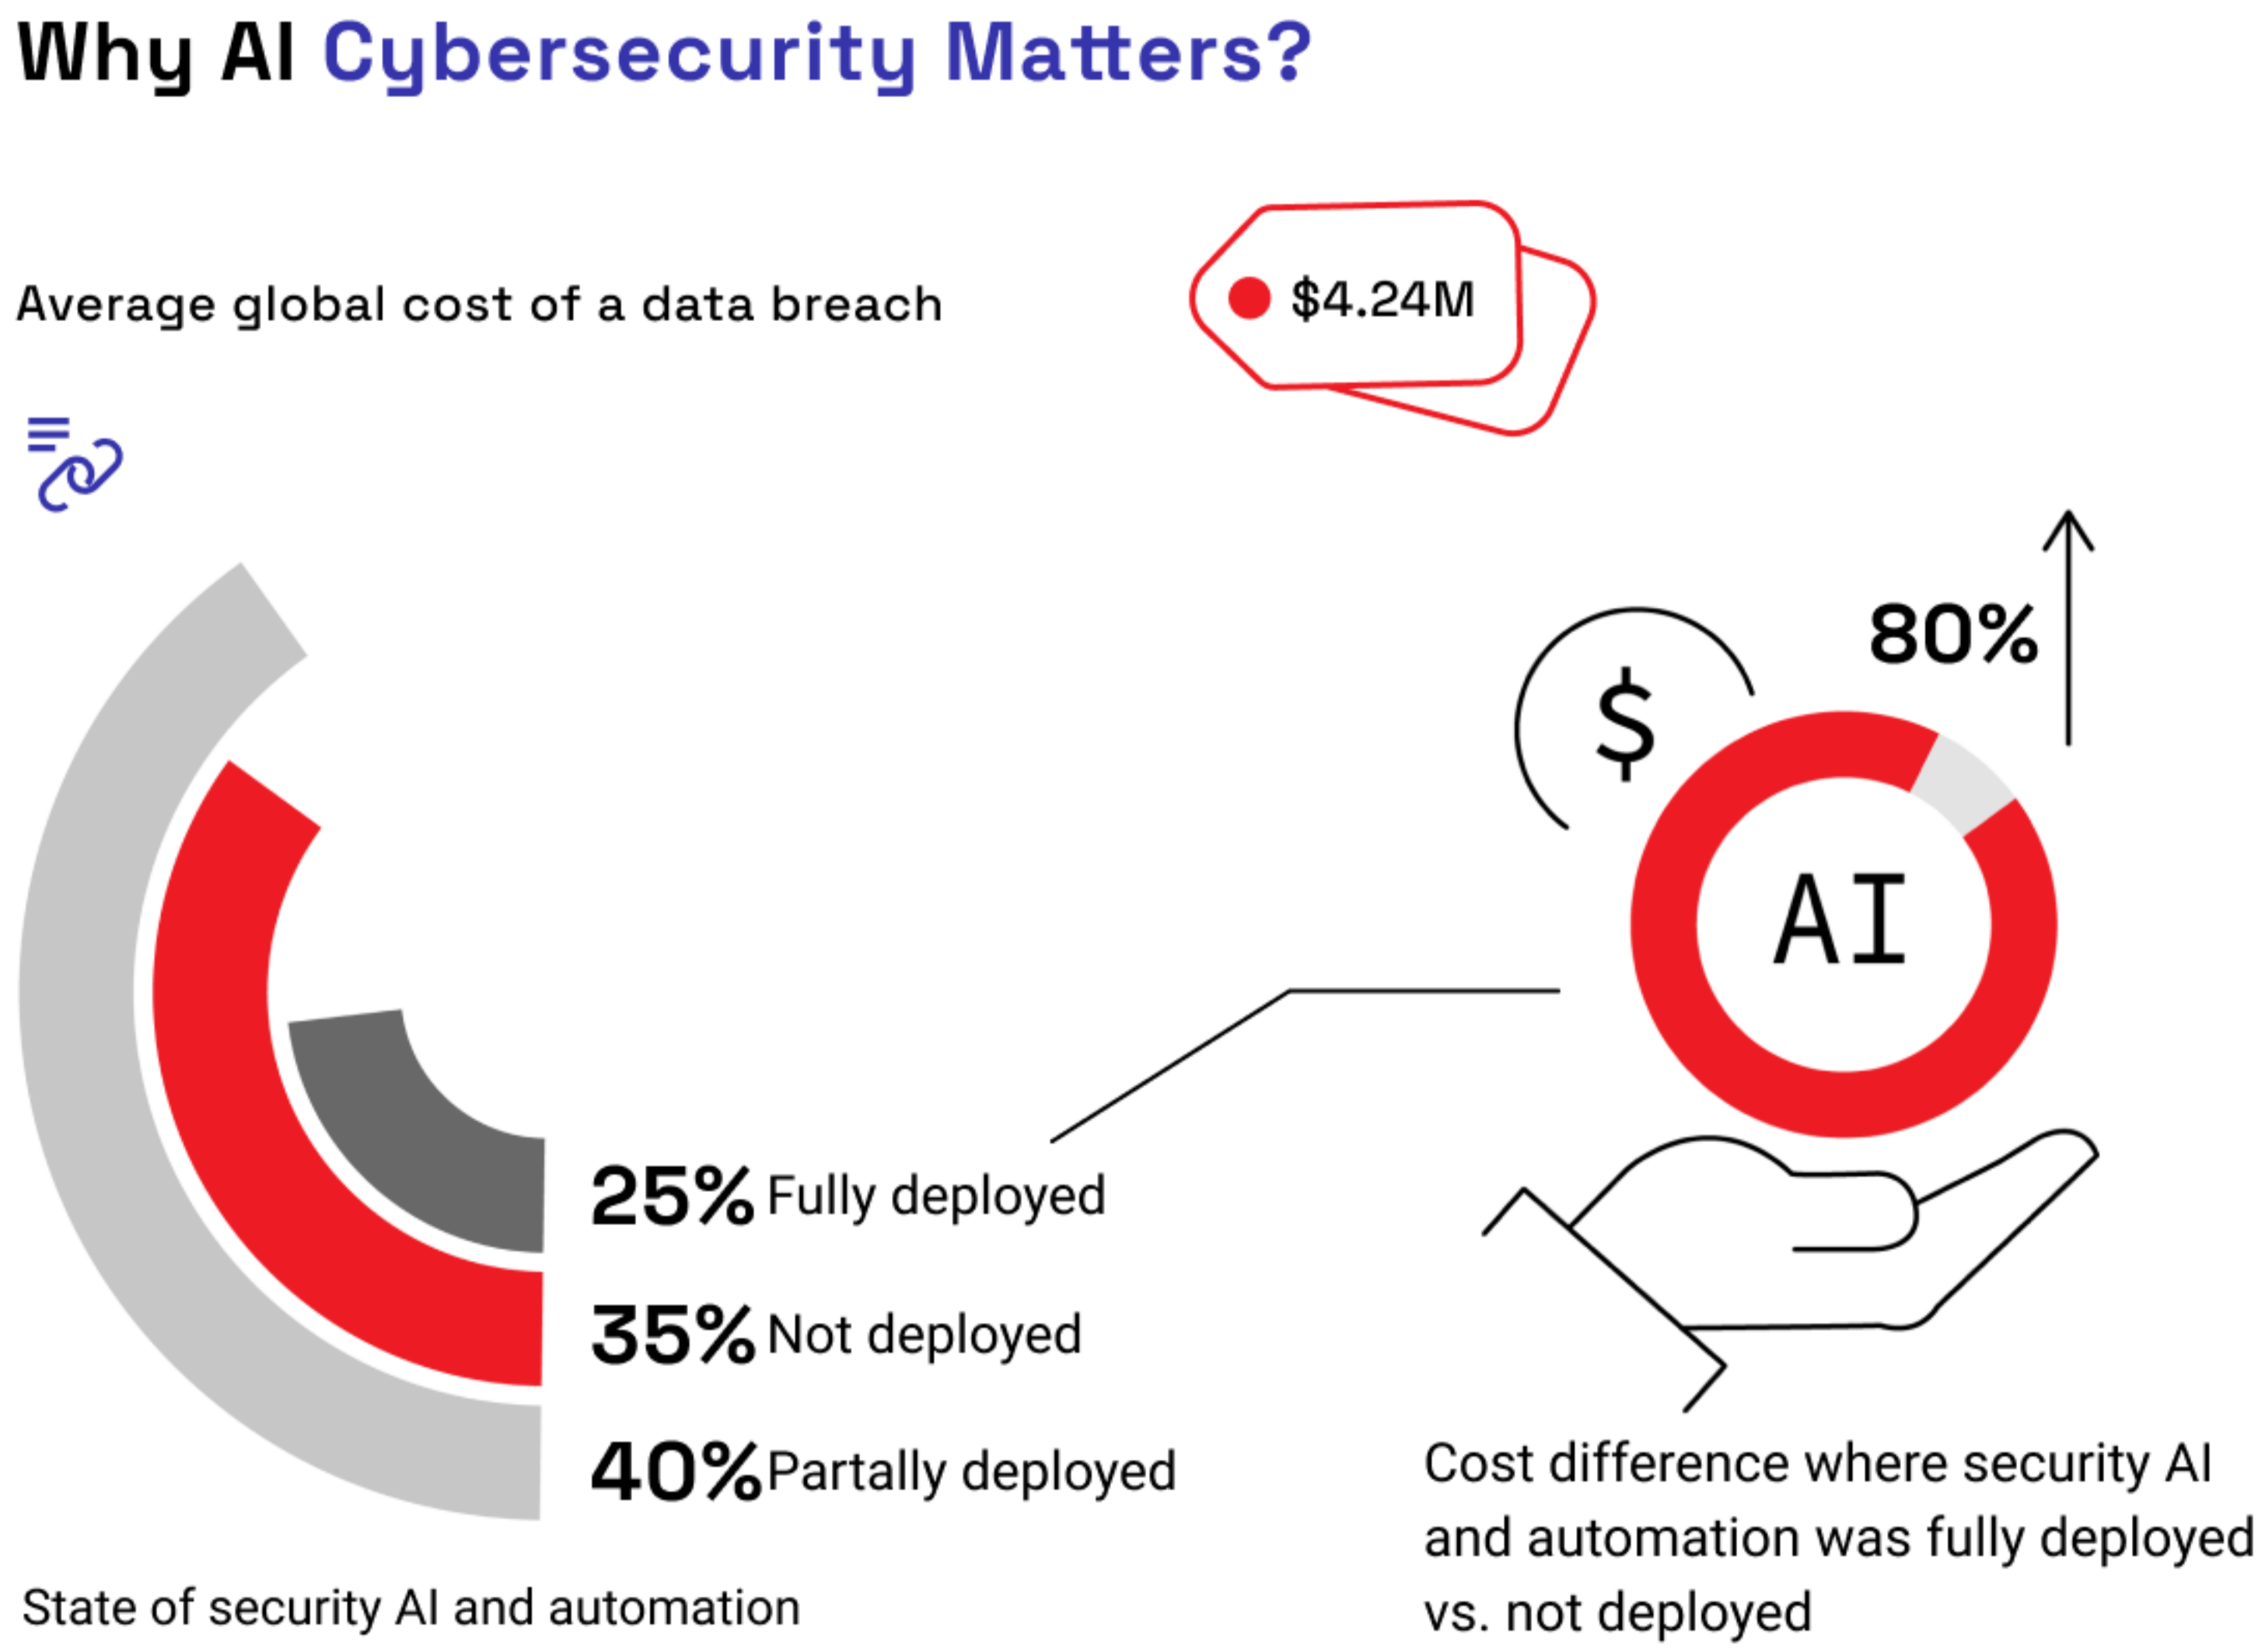

## Top Attack Vectors:

## Attacks by Geography

## Why AI Cybersecurity Matters?

AI EdgeLabs is an AI-powered platform that brings advanced network visibility, early threat detection, and automated incident response and remediation vital for the newest technologies for manufacturing and any other industry. EdgeLabs Threat Intelligence ensures:

- Threat detection in IoT equipment
- Hidden, unknown, and anomalous activity detection
- Smart firewalling with automated responses
- Asset management inside the manufacturing ecosystem
- Incident mitigation protocols

**PROTECT YOUR EDGE & IOT ENVIRONMENT**
